

# NO CHANGE. NO GAIN.

## **Business Technology Optimization.**

Outsourcing decisions. Compliance issues. The increasing complexities of applications and infrastructure – all are forces of change. With Business Technology Optimization (BTO) software and services from Mercury, you are in charge of change. You govern the priorities, processes, and people required to run IT like a business. You optimize the quality, performance, and availability of your software applications. In the end, you will master the complexity of business and technology change, control costs, and reduce risk. Find out how to change for gain at [www.mercury.com](http://www.mercury.com)

**Be The Change.**
